

- 70 -

27. The wireless communication management server according to claim 26, further comprising:

time setting means for setting a predetermined  
5 tentative permission time to tentatively permit an access  
to the desired network with respect to the mobile  
terminal in such a manner as to transmit, to the mobile  
terminal, information notifying the permission of the  
access to the desired network only for the predetermined  
10 time together with information notifying that the change  
of the link connection of the mobile terminal has been  
confirmed.

28. (Amended) The wireless communication  
15 management server according to claim 24, further  
comprising:

time setting means for setting, with respect to  
the mobile terminal, a predetermined permission time  
which is longer than the predetermined tentative  
20 permission time and for which the mobile terminal permits  
the access to the desired network in such a manner as to  
transmit, to the mobile terminal, the information  
notifying the permission of the access to the desired  
network only for the predetermined time together with the  
25 information notifying that the change of the link

Art. 19

- 70-1 -

connection of the mobile terminal has been confirmed in a case where the authentication result indicates authentication success.

Act. 19

DESCRIPTION BASED ON ARTICLE 19(1) OF THE CONVENTION

1. Claim 28 has been amended so as to depend on claim 24.
2. The other claims are not amended.
